## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 4/12/04
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in —

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a);

Claims 1, 2, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones, III et al. ("Jones").

Per claim 1 and 4, Jones discloses a connector for connecting a first electronic device to a second electronic device, said connector comprising: a body 20 defining a space, a wire 12 passing through said space, said wire having a first end and a second end, wherein said first end is configured to connect to said first electronic device, and a plug 110 (removably connected to body 20) having a third end configured to connect to said second end; wherein said plug is selectively disposed in or outside said space to connect to said second electronic device.

Per claim 2, said plug has a fourth end, and said second electronic device has a socket 30 for connecting to said fourth end.

***Claim Rejections - 35 USC § 103***

Art Unit: 2833

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones as in claims 1 and 4. Jones discloses arms 111 on plug 110 and holes 120 on body 20 rather than vice versa. At the time of the invention, it would have been obvious to include the holes on the plug and the arms on the body. Such a modification would have been a matter of obvious engineering choice, being merely a reversal of parts. In re Gazda, 104 USPQ 400 (CCPA 1963).

#### ***Allowable Subject Matter***

Claim 6 is allowable. The prior art does not suggest the universal serial bus (USB) connector as claimed, for connecting to a device having a USB socket as claimed, including the combination of all the claimed elements, the combination including the a body defining a space, the wire passing through said space, the latch, and the plug having a hole corresponding to said latch as claimed.

#### ***Response to Arguments***

Applicant argues that Jones does not disclose the plug removably connected to the body. The examiner disagrees. Jones plug 110 is removably connected to body 20, see figure 2.

#### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
